

we're hosting an event
STEELDAY2010

You're Invited to: La Corporation Corbec-Montréal Plant

Guests will tour our plant's state of the art hot-dip galvanizing facility and get to witness our automated machinery and process in action. We will also provide a short presentation giving an overview of what hot-dip galvanizing does, the benefits that come with it and the great strides that are being made. Our tour will focus on the galvanizing process and how we can help architects and engineers protect their projects from corrosion with minimum life cycle costs and maximum durability.
